Sun ONE Application Server 7 Platform Summary

This document provides the specifics on supported platform components for the Sun™ Open Network Environment (ONE) Application Server 7 product.

This document contains the following sections:

- Operating Systems
- Database Drivers
- Web Servers
- Directory Servers
- Browsers
- Software Packages

Operating Systems

This section lists the operating systems that are supported for the Sun ONE Application Server 7 product.

NOTE	The Sun ONE Application Server 7 product is only certified with J2SE1.4.0_02 from Sun Microsystems. Subsequent releases are expected to be interoperable, but some unexpected problems may arise.

NOTE	Third party J2SEs, even with appropriate version numbers, are not supported.

Operating System	Version	JVM
Solaris 8 for Sparc	32 and 64-bit	JDK1.4.0_02 or later
Solaris 9 for Sparc	32 and 64-bit	JDK1.4.0_02 or later
Windows 2000 Advanced Server, SP2 or higher	Intel 32-bit	JDK1.4.0_02 or later
Windows 2000 Server, SP2 or higher	Intel 32-bit	JDK1.4.0_02 or later
Windows 2000 Professional, SP2 or higher	Intel 32-bit	JDK1.4.0_02 or later
Windows XP Professional, SP2 or higher	Intel 32-bit	JDK1.4.0_02 or later

The Linux operating system will be supported in a subsequent release of the Sun ONE Application Server 7 product.

Database Drivers

This section lists the database drivers that are supported for the Sun ONE Application Server 7 product.

JBDC Vendor	JDBC Driver Type	Supported Database Server
Oracle	Type2, Type4	Oracle 8i: 8.1.6.x, 8.1.7.x Oracle 9i: 9.0x
Datadirect Technologies	Connect JDBC 3.0	Oracle 9i
PointBase (not available in the pre-installed version of the Sun ONE Application Server with Solaris)	Type4	PointBase Network Server 4.2

Web Servers

This section lists the web servers that are supported for the Sun ONE Application Server 7 product.

WebServer	Version	Operating System
Sun ONE Web Server	6.x	Solaris 8, 9/Windows 2000
Apache	1.3	Solaris 8, 9 Windows 2000
Microsoft Internet Information Services (IIS)	5.0	Windows 2000

Directory Servers

This section lists the directory servers that are supported for the Sun ONE Application Server 7 product.

Directory Server	Version
Sun ONE Directory Server	5.1 bundled with Standard Edition
Oracle	9i
LDAP v3	Compliant database for authentication use

Browsers

This section lists the browsers that are supported for web-based administration of the Sun ONE Application Server 7 product.

Browser	Version	Operating System
Netscape Navigator	4.79 or higher	Solaris 8, 9
Netscape Navigator	6.2 or higher	Solaris 8, 9, Windows 2000, Windows XP Professional
Internet Explorer	5.5 SP2	Windows 2000
Internet Explorer	6.0	Windows XP Professional

Software Packages

This section lists the associated software packages that are supported for the Sun ONE Application Server 7 product.

Software Product	Version
Sun ONE Message Queue	3.0.1
Sun ONE Studio (formerly Forte for Java)	Studio 4, Enterprise Edition for Java
ANT	1.4.1
