COREL

For OpenVMS

WordPerfect 7.1

It's more than just a word processor...

Corel WordPerfect 7.1 for OpenVMS character terminals delivers exceptional word processing features in a single, easy-to use software package. It offers seamless file compatibility with WordPerfect running on other platforms, and provides everything you need to communicate and collaborate clearly and effectively. Its enhanced document creation features include Make-It-Fit™ document formatting, Grammatik™ grammar checker, QuickCorrect™ typo correction, 28 document templates for the automation of everyday document creation, and basic Internet publishing.

...it's the most versatile and powerful communications solution for today's OpenVMS users.
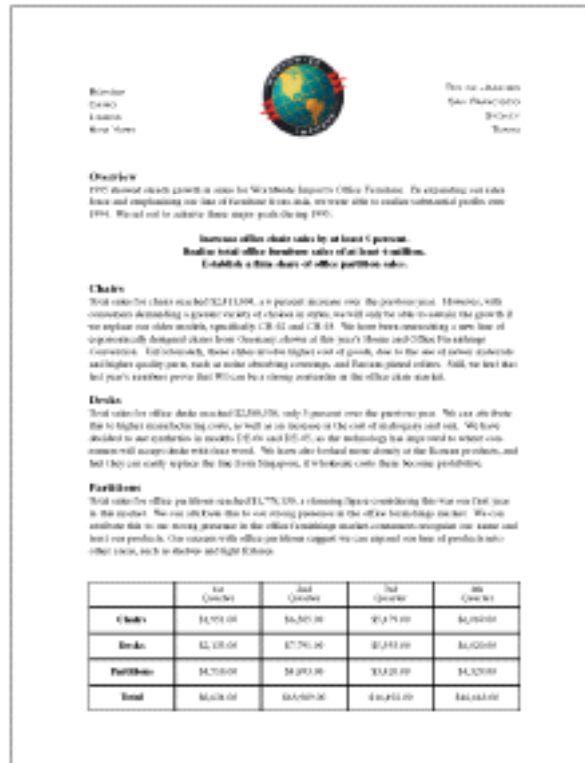

Empower Your OpenVMS Users

Text & Graphics

Seamlessly blend text and graphics to make dynamic document presentations. Add, move, rotate, and size images, wrap text on both sides of an image, or even contour text around odd shapes.

Tables

Analyze, organize, and present numbers and other tabular data. Tap the power of more than 90 advanced spreadsheet functions, including formulas, numerical cell formatting, automatic recalculation, data fills, named ranges, and more.

Web Documents

To produce a basic HTML document for your Web site, simply create it in WordPerfect and then publish it to HTML using Corel WordPerfect's easy-to-use conversion tool.

Templates

Completely automated Document Templates provide an efficient way to create document styles you will use again and again.
