

Table 1-4. Birth Rates by Live-Birth Order and Hispanic Origin of Mother and by Race for Mothers of Non-Hispanic Origin: United States, 1990-2001

(Rates are live births per 1,000 women 15-44 years in specified group. Live-birth order refers to number of children born alive to mother. Population enumerated as of April 1 for census years and estimated as of July 1 for all other years. Figures for live-birth order not stated are distributed. Rates for 1991-2001 have been revised using population estimates based on the 2000 census and may differ from rates previously published. See text and "Technical Notes," available at <http://www.cdc.gov/nchs/data/nvsr/nvsr51/nvsr51_12.pdf>)

* Figure does not meet standards of reliability or precision; based on fewer than 20 births in numerator.

- (1) Includes all persons of Hispanic origin of any race.
- (2) Based on data for 49 States and the District of Columbia which reported Hispanic origin on the birth certificate.
- (3) Based on data for 48 States and the District of Columbia which reported Hispanic origin on the birth certificate.
- (4) Includes Central and South American and other and unknown Hispanic.
- (5) Includes races other than white and black.

NOTES: Race and Hispanic origin are reported separately on birth certificates. Race categories are consistent with the 1977 Office of Management and Budget standards. Persons of Hispanic origin may be of any race. In this table Hispanic women are classified only by place of origin; non-Hispanic women are classified by race. See Technical Appendix.
